EDUCATION

R. V. College of Engineering <i>B.E. in Information Science and Engineering</i> — CGPA: 8.54	2022 – 2026 Bengaluru, India
MES PU College <i>Pre-University (Class XII)</i> — 94.33%	2020 – 2022 Sirsi, India

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript, TypeScript, SQL
Frameworks & Libraries: React, Node.js, FastAPI, SQLAlchemy, LangChain, Scikit-learn
Tools & Cloud: PostgreSQL, Git, Docker, Kubernetes, Prometheus, GitHub Actions (CI/CD), Azure
Concepts: REST APIs, DevSecOps, Machine Learning, Retrieval-Augmented Generation (RAG), LLMs, IoT

EXPERIENCE

Honeywell Technologies <i>Software Engineer Intern</i>	Jan 2026 – Jul 2026 Bengaluru, India
--	---

AI-Powered NHI Governance Platform — *Python, LangChain, GPT-4o, React, Azure*

- Built a DevSecOps platform to auto-discover and risk-score non-human identities across GitHub and Azure using a 0–100 scoring engine and 7-rule policy-as-code.
- Added GPT-4o risk summaries through a LangChain agent and automated audits with CI/CD pipelines, SAST/SCA gates, and Slack, Jira, and email alerts.

DevSecOps SRE & Engineering-Intelligence Platform — *React, TypeScript, FastAPI, PostgreSQL*

- Built a full-stack platform monitoring 400+ CI/CD runners across ~350 hosts through a runner-to-host metric-correlation engine.
- Shipped a stateful alerting engine, SSO with role-based access control (7 roles), and a pipeline unifying metrics from 5 enterprise security tools.

AI Dependency-Intelligence Assistant (RAG) — *FastAPI, Next.js, NetworkX, Azure OpenAI*

- Built a hybrid RAG assistant over a 1,000+ package dependency graph, grounding answers in a deterministic graph engine to prevent LLM hallucination.
- Delivered a streaming Next.js chat interface with interactive dependency-graph visualizations, secured by SSO/JWT.

PROJECTS

AI-Based Web Application Firewall — *Python, FastAPI, React, Scikit-learn* 2025

- Built an ML and rule-based WAF detecting SQL-injection, XSS, and command-injection at 95% accuracy, with a real-time inference pipeline, threat-analytics dashboard, rate limiting, and IP allow/deny lists.

AI-Powered Sign Language to Speech Converter — *ESP32, FastAPI, React* 2025

- Built an IoT glove (5 flex sensors + 6-axis IMU) with a Random Forest model at 92.4% accuracy and <40 ms latency across all 26 ASL alphabets, served via FastAPI with a React text-to-speech interface.

ACHIEVEMENTS & CERTIFICATIONS

- **Honeywell STAR Award** — “Drive Accountability Culture” (2026): recognized for ownership in delivering a GenAI-based security and runner-monitoring solution advancing to production.
- **National-Level INSPIRE Award (2016)**: selected participant for innovative project development.
- **Certifications:** Infosys Springboard — OS Fundamentals — Udemy — DSA (C/C++).
